| - React | - Problem Solving |
| - SASS | - Teamwork |
| - Webpack/Parcel | - Effective Communication |

Experience

Environmental Systems Corporation -

IT Support Technician 11/20/2019 - Current

Working with a small team supporting 150+ employees remotely. Provide Tier 1-3 level support of computer systems both Mac and Windows. Built company Sharepoint Site. Setup and maintain 3CX Phone system. Respond in timely manner to service desk tickets. Demonstrate excellent communication and problem-solving skills. Works well with team to collaborate on projects.

Movie Search Website -

<https://movie-search-site.netlify.app/>

Pulled data from TheMovieDB API calling several endpoints. Used Axios (Promise based HTTP client) to get the data using async/await. Shows Current Movies, Top Rated, Popular movies on the main page, and allows you to search for any movie. When a movie is clicked it opens a modal displaying more info and video trailer of each movie. Used webpack bundler and SwiperJS for the image slider.

E-commerce Website -

<https://ninetynineclothing.netlify.app/>

A clothing store SPA built using React. Utilized useState, useEffect, useParams, Props, React Router Dom. For the animations I used GSAP, Framer Motion, and Three.js. Shopping cart is saved to local storage and site is fully responsive.

Spotify Clone Website -

<https://spotify-clone-site.netlify.app/>

Multipage responsive clone of Spotify's website. Used HTML, SASS, and JavaScript, built Premium, Help, Download, Sign Up and Login pages. Complete with client-side form submits on the Sign Up and Login pages, used regex for passwords and email verification, and parcel bundler. Showcasing the ability that I can take any design and transform it into a website.
